- Both SDS documents require adequate ventilation, avoidance of breathing vapours/mist/spray, and use of appropriate PPE as necessary.

Hydroprufe LG - Base

Hydroprufe LG - Curing Agent

Although the supplier has advised that exposure limits should not be exceeded under normal controlled use, Premcrete's position remains that standard H&S precautions must always be followed, especially as:

- The Base is classified as a skin/eye irritant and skin sensitiser.

Hydroprufe LG - Base

- The Curing Agent is classified as corrosive (severe skin burns/eye damage), skin sensitiser, and carries a reproductive hazard classification (suspected of damaging fertility/the unborn child).

## Mandatory controls for internal / confined applications

Ventilation

- Provide natural ventilation (open windows/doors) and/or mechanical ventilation/extraction to maintain airflow in the work area.

Hydroprufe LG - Base

Hydroprufe LG - Curing Agent

- Where ventilation is limited (small rooms/plant rooms), use local extraction and keep exposure time as short as reasonably practicable.

Access control

- Restrict access to the application area to trained operatives only.
- Keep other building occupants out of the work zone until curing is complete and the area has been ventilated.

PPE (minimum)

- Chemical resistant gloves (e.g., butyl rubber), protective clothing, and approved eye/face protection.

Hydroprufe LG - Base

Hydroprufe LG - Curing Agent

- Respiratory protection to be worn where required by the risk assessment (e.g., limited ventilation, close work, or any noticeable irritation).

Hydroprufe LG - Base

Hydroprufe LG - Curing Agent

Safe handling

- Avoid contact with skin/eyes and avoid inhalation of vapours/mist/spray.

Hydroprufe LG - Base

Hydroprufe LG - Curing Agent

- Follow good hygiene practices: wash thoroughly after handling and do not eat/drink in the work area.

Hydroprufe LG - Base

Hydroprufe LG - Curing Agent

Confined space note

- If the area meets the definition of a *confined space* (restricted access/egress and limited ventilation), a confined-space risk assessment (and permit where applicable) must be completed, including emergency arrangements.
